

Directory Tree, program location information Mercurius:

- become camrasdemo usr
- run `~/frb/start_frb.sh` bash script to start recording observation programs leading to storage
 - these are the USRP_to_vrt, and VRT_to_filterbank scripts
- Data is stored in: `/data/camras/demo/frb`
- make `.png` diagnostic plots from the `.h5` files: `~/frb/plot_h5.py`
- run `check_frb.py` with `~camrasdemo/frb/check_frb.py` in the same dir you want the processed dir to be created
